differential (half load) 65/35 wash, left or right

full electronic display

1-9 hour delay timer

5 stage self-cleaning filter

anti flood, Total ACQUASTOP

warranty

two years parts and labour

Functions

DELAY TIMER:

A delay timer can postpone the start of the programme by up to 24 hours, for convenience and also to take advantage of off-peak energy periods

TOTAL AQUASTOP:

In addition to the partial Aquastop protection present in all Smeg dishwashers, some models have an electronic device fitted to the water intake hose, which monitors water levels in the machine, detects leaks in the hose and switches off the water supply immediately when necessary.

ORBITAL WASH SYSTEM:

This system consists of a double spray arm, with contra-action rotation, which distributes water evenly throughout the cavity. The spray arm jets are perfectly shaped to direct the water with precision, ensuring an excellent wash quality and a greatly reduced noise level.
